

Stage 1 - Dataset Cleanup Summary

Report date: 28.07.2026 - Final Stage 1 manual QA results

1. Before and after

100 BEFORE: RECORDS	90 AFTER: RECORDS	835 BEFORE: SPANS	609 AFTER: SPANS
-------------------------------	-----------------------------	-----------------------------	----------------------------

Metric	Before	After
Records	100	90
Spans	835	609
Invalid labels	8	0
Automatic errors	8	0
Automatic warnings	35	17

Label distribution

Label	Before	After	Difference
PERSON	153	91	-62
ORGANIZATION	80	82	+2
LOCATION	101	60	-41
TIMEDATE	164	122	-42
PRODUCT	87	81	-6
WORKOFART	59	50	-9
JOB	100	58	-42
AMOUNT	83	65	-18
COMPANY	8	0	-8

Note: automatic audit findings are not a count of all semantic errors. The initial 43 findings included 8 errors and 35 warnings.

2. Cleanup actions

- Split multi-word person names were merged into single spans.
- Incorrect labels were fixed, especially COMPANY, AMOUNT/TIMEDATE, and PRODUCT/WORKOFART/ORGANIZATION confusions.
- Extra words, punctuation, and possessive markers were removed from span boundaries.
- Missing entities were added; unsupported JOB labels on generic departments, teams, and fields were removed.
- Ten records were removed only from the processed data because severe OCR, encoding, or nonsensical text prevented reliable annotation.

Cleanup result

76 CHANGED	14 UNCHANGED	10 REMOVED	0 STRUCTURAL ERRORS
----------------------------------	------------------------------------	----------------------------------	---

Check	Result
Raw data	Unchanged and stored separately
Processed data	90 records in JSONL and Parquet
Reproducibility	Rebuilt from the correction manifest and script
Remaining 17 warnings	Reviewed across 12 records and accepted
Manual QA	All 90 retained records reviewed; queue retained locally

Status: Cleanup, second manual QA, and policy 1.0 are complete. Publishing the clean dataset in a separate public Hugging Face repository with the full dataset card remains.
